

PAS68 & IWA14-1 Railing Systems - Street Furniture EAG08000

Eagle Shallow Pedestrian Rail and Bridge Expansion Solutions

Eagle have two pedestrian rail solutions depending on client requirements. The first solution has a shallow solution of 400mm impact tested at 90 Degrees.

The latest innovation is designed to meet requirements of bridge expansion joints. Tested with a clearance of 4.1m between bollards and only 50mm of foundation producing only 0.5m of penetration. This product however has uses way beyond just bridging expansion joints.

IWA14-1:2013 V/7500(N3C)/48/30:0.5 Tested on N3C vehicle Super Shallow Foundation only 50mm 4.1m Clear Opening Foundation Bridging Capability 150mm Expansion Capability Lightweight and Removable Beams Architectural with Modern and Historic Fretwork Designs For further information see product details below
