

Traffic Barriers

Automatic Traffic Barriers can also be used for site access or factory entrances where the size and length of boom are greater than that required for car parking barriers.

Traffic barriers provide a viable and effective solution for the control of vehicle access to commercial and residential properties. These can come complete with various access methods such as key pads or control cards.

Eagle can provide you with Traffic Barriers that are highly effective, making them both easy to see and easy to use. They can provide control for all types of vehicles as well as providing safety and security for pedestrian access within a restricted area. We can provide traffic barriers according to your exact specifications and will endeavour to make sure that they comply with safety laws and regulations.

Our car park barriers are an ideal solution in controlling access to unauthorised areas, and monitoring capacity. All of our road barriers are manufactured to the highest quality standards in the United Kingdom.
