

Government Approved Turnstile

The EAG09-430A Wylle Advanced security turnstile has been tested and approved for UK Government use. The tool category is for deliberate forced entry of well protected premises using bodily physical force and a wide selection of attack options. The turnstile is designed to be surface mounted for rapid deployment.

Applications

- Airports
- Power Stations
- M.O.D Sites
- Ports

Specification

- 90° Locking head mechanism, electrically released in both directions
- Rotor sensing relays to provide a voltage free contact following the rotation of the rotor in either direction
