

LPS1175 A1 (SR1) Double turnstile EAG09000-1491-211

## Product Description

1491 double turnstiles featured here are part of the 1491 turnstile range.

Type 1491 Security turnstiles have been externally tested, approved and accredited to LPS1175: Issue 8, certificate 1572 and can be found in the Red Book. You will need to search for turnstiles.

The double units in the turnstile range are comprehensive, encompassing A1(SR1)-C5(SR3) rated turnstiles with straight bar rotors.

The biggest single advantage of a double unit is that it fits in a single standard fence panel. The B3(SR2) and C5(SR3) versions have straight bar rotors strengthened to meet the requirements of the LPS standard. The end panels have been modified for increased resilience.

The turnstile is designed to be surface mounted for rapid deployment.

LPS1175 A1 (SR1) Double turnstile EAG09000-1491-211

## Applications

- Airports
- Power Stations
- MOD Sites
- Ports

## Key features

- 90° Locking head mechanism, electrically released in both directions
- Rotor sensing relays to provide a voltage free contact following the rotation of the rotor in either direction
- Status light LED panels to indicate when to proceed
- 240V AC mains supply 2 amp
- Fail locked on power failure
- Walkway canopy with down light
- Side panels clad in galvanised weld mesh (SR2-SR4): this is see through for CCTV
- Bolts directly onto concrete base
- Finish powder coated standard RAL colour
- Can be assembled on site, if delivered flat pack
- Refer to individual drawings for more information

## Specification

- Double turnstile (W 2,000mm D 1,330mm)
- Fits inside a standard fence panel
- 1491-211-S A1(SR1) Straight bar rotor arms
