

PAS68 & IWA14-1 Railing System - Super Shallow and Shallow solutions

Eagle Shallow Pedestrian Rail and Bridge Expansion Solutions

Eagle have two pedestrian rail solutions depending on client requirements. The first solution has a shallow solution of 400mm impact tested at 90 Degrees.

The latest innovation is designed to meet requirements of bridge expansion joints. Tested with a clearance of 4.1m between bollards and only 50mm of foundation producing only 0.5m of penetration. This product however has uses way beyond just bridging expansion joints.

IWA14-1:2013 V/7500(N3C)/48/30:0.5
Tested on N3C vehicle
Super Shallow Foundation only 50mm
4.1m Clear Opening
Foundation Bridging Capability
150mm Expansion Capability
Lightweight and Removable Beams
Architectural with Modern and Historic Fretwork Designs
