

## PAS68 & IWA14-1 Railing Systems - Street Furniture EAG08000

### Eagle Shallow Pedestrian Rail and Bridge Expansion Solutions

Eagle have two pedestrian rail solutions depending on client requirements. The first solution has a shallow solution of 400mm impact tested at 90 Degrees.

The latest innovation is designed to meet requirements of bridge expansion joints. Tested with a clearance of 4.1m between bollards and only 50mm of foundation producing only 0.5m of penetration. This product however has uses way beyond just bridging expansion joints.

IWA14-1:2013 V/7500(N3C)/48/30:0.5
