

Gate Remote Controls

Eagle automated residential gates can be supplied with a wide range of automated electric gate remote controls to simplify entry to your property and to restrict access to unwanted visitors, providing variable levels of security and operation to suit all applications.

Our [gate remote controls](#) are ideal for all of our [swing gates](#), [sliding gates](#) and [bi-folding gates](#) providing access to residential properties, private roads, gated communities and residential estates.

Being able to control your residential gate remotely is extremely convenient, meaning that you do not need to manually operate the gate and it can be controlled from a distance or from inside a vehicle.

As one of the UK's leading automated gate suppliers, we are able to design and build bespoke solutions for all of our clients to suit every requirement, specification and environment, that includes remote access fobs and controls.

We supply gate remote controls by some of the industry's leading providers including FAAC, Fadini, BFT, Came Remote Controls.

Gate Remote Controls

Eagle take user safety extremely seriously making sure that all of our dedicated automated gate installers are fully trained and qualified to carry out any remote access works.
